About us

Welcome to HASCON Enterprises, a premier engineering and materials supply enterprise driving the development of Pakistan's modern infrastructure. Serving both the public and private sectors, we specialize in delivering high-performance materials and expert metal fabrication services. Our ongoing expansion into the country's most ambitious mega-projects reflects our capability, scale, and reputation as a trusted supply chain partner.

Driven by a clear vision and unwavering commitment, HASCON Enterprises strives to add value to our clients' businesses. We provide world-class, cost-effective solutions that reliably meet the diverse supply needs of our business partners.

Our end-to-end supply ecosystem encompasses a wide range of essential construction inputs, including civil construction materials, steel, plastics, wood, and specialized soils. Beyond material procurement, our custom structure fabrication capabilities—spanning steel, iron, aluminum, and other metals—allow us to support complex engineering requirements from conceptual planning to final delivery, ensuring every component meets rigorous structural and regulatory standards.

We are guided by a philosophy centered on value creation, innovation, and client success. At HASCON Enterprises, we view our clients not merely as customers, but as long-term partners. By delivering solutions tailored to specific project demands, we help streamline procurement, minimize downtime, and drive operational efficiency across every engagement.

A deep understanding of local market dynamics enables us to offer premium services at competitive price points. We firmly believe that top-tier quality should never come at an inflated cost. Through strategic sourcing, streamlined logistics, and disciplined overhead management, we consistently deliver top-grade materials and fabrication at prices that protect our clients' bottom lines.

As Pakistan continues to grow and modernize, HASCON Enterprises is positioned at the forefront of this industrial transformation. We remain committed to expanding our capabilities, fostering trusted relationships, and delivering dependable supply solutions that turn ambitious engineering visions into lasting reality.

What We do

What We Do

Structural & Precision Metal Fabrication

We offer specialized fabrication services using high-grade Stainless Steel (SS 304) and Mild Steel (MS) materials. Our skilled workforce and modern machinery enable us to manufacture custom structural frameworks, components, and heavy-duty steel fixtures engineered to meet strict technical specifications, structural loads, and durability standards required for modern infrastructure.

Construction & Waterproofing Membranes (Polythene Sheets)

HASCON Enterprises is a reliable supplier of heavy-duty polythene sheeting, offering gauges up to 0.5mm in thickness. Essential for site preparation, moisture barrier insulation, slab underlayment, and temporary weatherproofing, our high-density plastic sheets are built to resist punctures, tearing, and environmental wear on demanding job sites.

Specialized Aggregates & Construction Sands

We source and deliver specialized construction aggregates, including high-purity Ravi Sand and specialized Dragger Sand. Essential for concrete mixing, plastering, masonry, and foundational backfilling, our bulk aggregate supply guarantees consistent grain quality, proper silt control, and timely site deliveries to keep your pour schedules on track.

Reinforcement & Construction Mesh Solutions

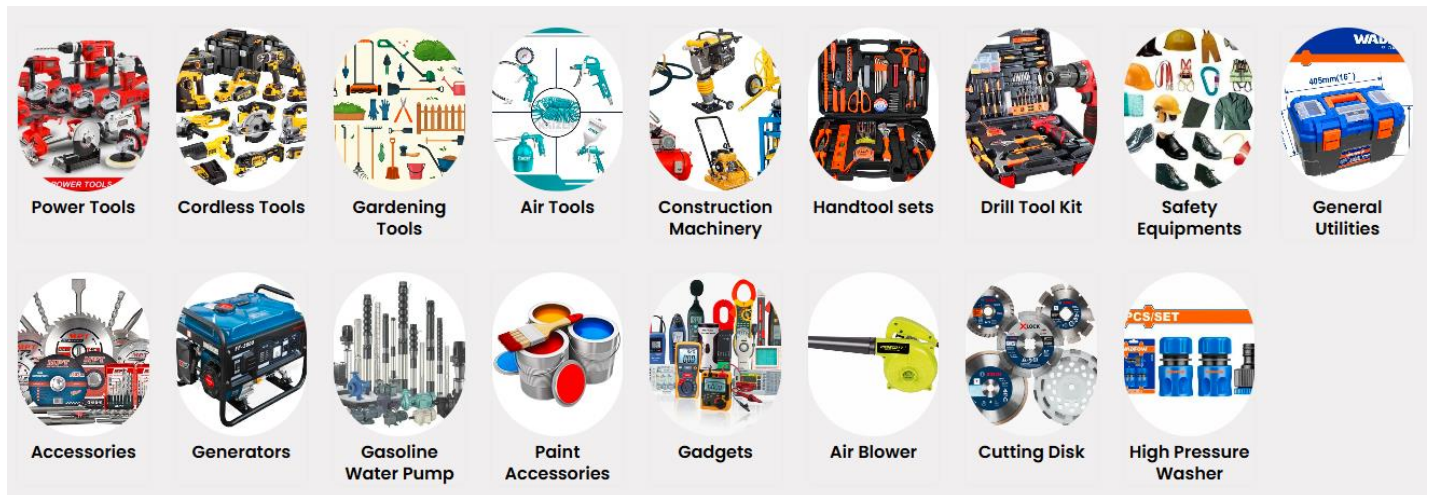

We supply top-tier welded wire mesh and specialized construction mesh systems tailored for heavy slab reinforcement, plastering work, and structural stability. Trusted on major high-profile developments—including CCECC projects such as the Nawaz Sharif Cancer Hospital in Valencia and the Lahore Airport Building Extension—our mesh products deliver superior tensile strength and reliability under demanding structural loads.

Industrial Power Tools & Construction Equipment

To keep site operations moving efficiently, we provide a broad inventory of heavy-duty power tools and specialized construction equipment. Sourced from leading manufacturers, our tools—ranging from cutting and

grinding tools to drilling and fastening equipment—are selected for maximum safety, durability, and high performance in rigorous site conditions.

Industrial & Commercial Adhesive Tapes

We cater to large-scale procurement needs with bulk supplies of all types of commercial and industrial adhesive tapes. From heavy-duty masking, duct, and packing tapes to specialized surface protection and insulation tapes, our products deliver strong adhesion and resilience for packaging, sealing, and surface preservation throughout project phases.

Safety Equipment & Personal Protective Equipment (PPE)

We supply a comprehensive range of high-quality **Safety Items and PPE** to ensure workplace safety and compliance with international safety standards:

- **Personal Protective Equipment (PPE):** Safety Helmets, High-Visibility Vests, Eye Protection Glasses, and Face Shields.
- **Foot & Hand Protection:** Heavy-duty Steel Toe Safety Shoes, Chemical & Heat Resistant Gloves, and Cut-Resistant Gloves.
- **Respiratory Protection:** Dust Masks, Industrial Respirators, and Reusable Filters.
- **Fall Protection Gear:** Full-body Safety Harnesses, Lanyards, and Fall Arrest Systems.
- **Site Safety & Emergency Care:** Traffic Cones, Safety Barriers, Caution Tapes, Fire Extinguishers, and First Aid Kits.
